

SousVideTools®

iVide Plus Thermal Circulator

The SousVideTools® iVide Plus Thermal Circulator with a high resolution 4.5 inch wide touch screen interface. It is WIFI enabled meaning you can control it remotely from anywhere via our APP, it's also designed to ensure food safety. With an 80 litre capacity it guarantees a temperature stability of 0.07°C between 40°C to 100°C. 2 year warranty.

POWER SUPPLY

UK 3 pin plug or Schuko plug for Europe

WARRANTY

2 year warranty

The iVide Plus is the first water proof device for the commercial kitchen, certified to IPX7. Under the IPX7 designation, the iVide Plus Sous Vide cooker will be able to withstand immersion in water up to 1 meter for up to 30 minutes. This means should an accident happen, and the device is splashed or submerged it will not cause damage, but prolonged exposure - such as placing in a dishwasher - would be harmful.

Not only is it the 1st water proof Sous Vide cooker for the professional kitchen, it also comes complete with our iVide APP (available now on iOS and Android). The iVide APP includes features such as:

- + Precise temperature control from anywhere
- + A collection of over 600 recipes
- + Our Sous Vide Calculator: We've done all the testing and research for you, which means no more scouring the internet for information.
- + Recipe memory: Store your own times and temperatures
- + Cook history: For greater HACCP control store your last cook 10 times and temperatures
- + Multi device cooking: Control several cookers from one APP.
- + Notifications to confirm when the water is at temperature, and the food is cooked. Cook time complete, don't worry the APP will keep the food at the optimum temperature for holding.
- + Multi-language control: The 1st ever multi lingual Sous Vide cooking APP.

The iVide Plus Sous Vide Cooker and its APP were built and designed from scratch to work together, and we're just as dedicated to the quality of our products as we are to the food you make with them. However if you want to use this device without the app it's not a problem either as the unit can be operated manually offline via its on screen display.

It is the most-heavy duty unit on the market. A 2.2kW heating element means faster heating times, so time spent waiting for the cooking vessel to reach temperature is minimal. This professional model has been designed so that you just clamp the unit to the side of any suitable stainless/ polycarbonate container/kitchen vessel up to 80 litres capacity, and you have an instant temperature- controlled Sous Vide water bath, with a working temperature of 5°C to 99°C, and accuracy of 0.0 7°C. The stirred technology ensures no hot or cold spots. Its space saving design allows for quick storage.

IPX7
Immersion in water
To a depth of 1m

2 YEAR WARRANTY

The timer can be set between 1 minute and 99 hours. Once the cooking time has completed the unit will notify you by both an alarm and display indicator, whilst continuing to operate. Temperature control is very simple, with touch button control. This model also features a low water level protection, meaning should you or a colleague accidentally turn the circulator on empty or allow the water level to drop below the minimum required the circulator will shut off and notify you by both an alarm and display indicator (H2O) ensuring it remains undamaged. The machine is completely constructed in stainless steel meaning it can withstand the pressures of the commercial kitchen.

KEY FEATURES

- + High precision Sous Vide thermal circulator with temperature control
- + 4.5 inch touch screen interface
- + 2.2KkW heating element
- + Designed to fit to any round or flat cooking vessel with a minimum depth of 16.5cm by means of a clamp
- + Best performances up to 80 litres
- + Working temperature 5°C to 99°C, accuracy 0.07°C
- + Multiple machines can be managed from the APP
- + Offers exceptional temperature stability
- + Low level water protection device switches off the Sous Vide in case of accidental use without water
- + Circulating pump to eliminate cold and hot spots
- + Temperature sensor to prevent overload and overheating
- + A convenient handle makes it easy to carry
