ECO

RANGE

The ECO range is formed using at least 80% recycled material - making it the most sustainable range from Hillbrush.

ECO RANGE

RECYCLED
MATERIAL

DURABLE

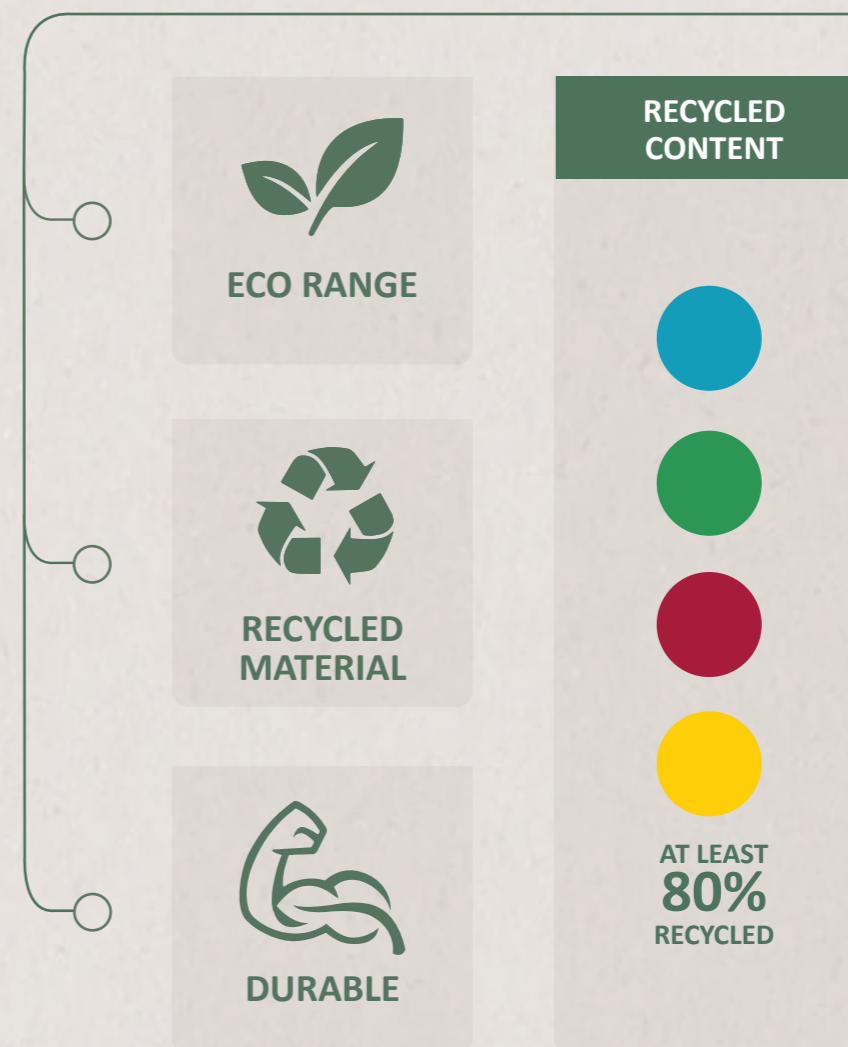

80% +

The plastic used in our ECO Range comes from post-consumer waste such as PET bottles.

Our Eco Range offers strong eco-credentials that make the brushes economical and sustainable.

This brushware is made from post-consumer recycled plastic, from products that have been thrown away, collected, cleaned, reprocessed, and then remade into this Eco Range. Products made from post-consumer recycled plastic close the loop, diverting plastic products from landfill.

Lightweight fully colour-coded brushware, made from recycled content. Ideal for use in HORECA (*hotel, restaurant, catering*) industries in five colours to avoid cross-contamination. If colour is not critical, then the black option has the benefit of a higher recycled content.

Hillbrush Eco 180mm Stiff Hand Scrub

B1918

With its robust and sturdy filaments, this powerful tool is designed to effortlessly agitate and effectively eliminate even the most tenacious surface debris. Say goodbye to stubborn dirt and grime as the stiff filaments tackle and remove it with ease.

PLANET & PURPOSE SUSTAINABILITY

THE FUTURE IN OUR HANDS.

The cleaning industry is faced with the challenge of providing services and products in a world of ever-decreasing natural resources and pressure on the natural environment. From 100% fully recycled products to using fewer raw materials in manufacturing, Hillbrush is constantly looking at ways to integrate sustainability into the design of it's products and operations.

HILLBRUSH SUSTAINABILITY

WORKING TOWARDS

ISO 14001

SCOPE 3

Current initiatives include working towards ISO 14001 and Scope 3 accreditation, as well as a B Corps certification.
