

# MIRAGE MELAMINE TABLEWARE

## 10% OFF ALL MIRAGE FUSION

### A LIDDED FOOD-SAFE SOLUTION

Our Exclusive Mirage tableware is a collection of melamine products designed to provide a stylish and practical solution for food presentation and display.

## WHAT IS MELAMINE AND WHAT ARE THE BENEFITS?

Melamine is an organic-based, nitrogen-rich compound used to manufacture cooking utensils, plates, plastic products, and more. Melamine resin is durable, fire and heat resistant and virtually unbreakable. Melamine crockery is continuing to grow in popularity and is suitable for use in schools, hospitals, care homes and workplace canteens due to the hardwearing and scratch resistant benefits.

#### DURABLE AND RESISTANT

Melamine tableware is the ideal solution due to it being highly durable and scratch resistant. Perfect for use within the hospitality industry.

#### EASY TO CLEAN AND DISHWASHER SAFE

Melamine tableware is non-porous, easy to rinse and stain resistant. It is also safe to put in the dishwasher, which makes those busy services effortless.

#### FOOD-SAFE AND BPA FREE

[FDA Safety and Risk Assessment of Melamine](#) states that melamine is food-safe if conventional oven and microwave use is avoided due to high temperatures.

## FUSION BOWLS AND PLATES

Get ready to reopen with [new Fusion melamine bowls and plates](#), an embossed matt exterior and smooth gloss interior, we recommend combining them with the glossy plates to add theatre to every setting and to ensure food safety.

We have brought back our Back To Work campaign to support the reopening of the Hospitality Industry on the 12th April.
