COFFEE GUIDE 2022

Espresso

When Espresso bars popped up in London through the 1950's, coffee in the UK changed forever. An intense flavour with characteristics dependent on the origin and roast of the coffee, Espresso is a short drink usually served in a 3 - 4oz cup or glass.

Italian in origin, it is the base to most drinks on the menu.

Since 2015, astronauts on the International Space Station can brew fresh espresso on board.

With its origins in Italy, today the espresso is enjoyed globally; either as a drink in its own right or as the base to specialty coffee.

Macchiato

Quite simply put, Macchiato translates as a coffee 'stained' with milk. Espresso with a dollop of thickly textured milk, served in a 3 - 4oz cup or glass.

A macchiato is perfect for those who find espresso too harsh, but a cappuccino too weak.

Flat White

This drink changed the game for good when it hit UK shores in the early 2000s, spawning numerous specialty coffee shops all looking to serve the best coffee.

Typically served in a 6oz cup or glass, it is made up of a double Espresso and thinly textured milk.

Cappuccinos and lattes can be made with one or

two shots of espresso, but a flat white traditionally features two.

Americano

During the Second World War, American soldiers couldn't take the strength of the Italian espresso so diluted it with hot water and thus the Americano was born!

Served in various sizes, this drink, like the Long Black, combines Espresso and hot water, but unlike the Long Black some people do add a splash of milk.

Interestingly, several studies suggest that coffee could support liver health and protect against disease.

Cold Brew

A revelation for the balmy, hot conditions we experience during summer in the UK...

Ok, that may not be true but cold brew coffee genuinely is a revelation.

Brewed cold, no heat is introduced to the ground coffee resulting in a drink that celebrates the individual characteristics of the coffee with limited acidity and bitterness. This drink should be enjoyed in a glass over ice (without milk). A very good alternative to Espresso as an ingredient in cocktails.

Cold brew coffee tastes much sweeter than regular coffee because it has approximately 67% less acidity than a hot brew.

Tea

A British staple, there are five types of tea – Black, White, Green, Oolong and Pu-erh. The type of tea is dependent on the age of the leaf. Whether served in glass (herbal teas), ceramic (black tea) or more traditionally in a pot, the humble cuppa has a place on every menu.

It takes around 2,000 tiny leaves to make just one pound of finished tea!

Know your coffee

Did you know that coffee beans originated from the Ethiopian Plateau in the 9th century? It's amazing how many different types of coffee drinks are now available.

Who would've known a few small beans would create a range of hot and cold beverages!
