PRODUCT USE

MIRAGE MELAMINE

Mirage is made from 100% melamine. This is the only grade of melamine recommended for use in the catering and hospitality industries. Melamine is a synthetic polymer produced from organic compound and formaldehyde. 100% melamine is dimensionally stable and can withstand heat up to 140°C.

FOOD SAFETY

Mirage melamine is 100% food safe. To ensure that Mirage meets all relevant food safety regulations, each piece has been tested extensively by world recognised laboratories.

FOOD USE

The Mirage range has been designed to be used at ambient or chilled temperatures. Mirage should not be used in a microwave or a conventional oven. Hot or cold food can be served on Mirage. It is possible to place 100% melamine products on a hot counter for short periods of time. However all melamine can distort and discolour if used on a hot counter for prolonged periods of time and this is not recommended.

BREAKAGE

Mirage is designed to be highly durable in a wide range of catering and hospitality environments. It is shatterproof and resistant to edge chipping. However no melamine product can claim to be completely unbreakable. If the product chips, it should be withdrawn from use and replaced.

CARE & CLEANING

- Serrated knives should not be used on melamine products
- Do not use melamine products in conventional & microwave ovens
- If hand washing, do not use harsh abrasive cleaners, steel wool or metal scouring pads on melamine products
- Chlorine bleach should not be used on melamine products
- If required, pre-soak melamine products in a high quality dishwashing detergent
- Mirage is dishwasher safe. However hand washing will ensure that the appearance of your product is maintained for longer
